

## DEMOGRAPHICS

### Community Vision – Work to preserve small-town rural lifestyles.

#### Population Growth

Most of our region is experiencing steady population growth, particularly Archuleta and La Plata counties. Much of this growth can be attributed to what is being termed "amenity migration". Newcomers are moving in to take advantage of the area's unique natural resources, quality of life, and other amenities that the region offers. Many of these newcomers are retirees or second homeowners that bring along their pensions and other retirement benefits. This "new" money impacts the local economy as it is spent on new homes and goods and services.

Population - Census Counts					Estimate
	1970	1980	1990	2000	2008
Archuleta	2,733	3,664	5,345	9,898	13,155
Dolores	1,641	1,658	1,504	1,844	2,032
La Plata	19,199	27,195	32,284	43,941	51,114
Montezuma	12,952	16,510	18,762	23,830	26,401
San Juan	831	833	745	558	594
Region 9	37,356	49,860	58,640	80,071	93,296

Some people move here for economic reasons, such as the availability of jobs. Others cite quality-of-life issues, such as clean air and water, and outdoor recreation.

Source: Colorado Demography Office April 2008

Most of the growth has occurred in unincorporated areas of the counties, reflecting the conversion of agricultural land to rural subdivisions. Population growth also has created a demand for government agencies to provide services such as treated water and sewer, infrastructure improvements such as new schools, and transportation systems to newly annexed commercial and residential areas.

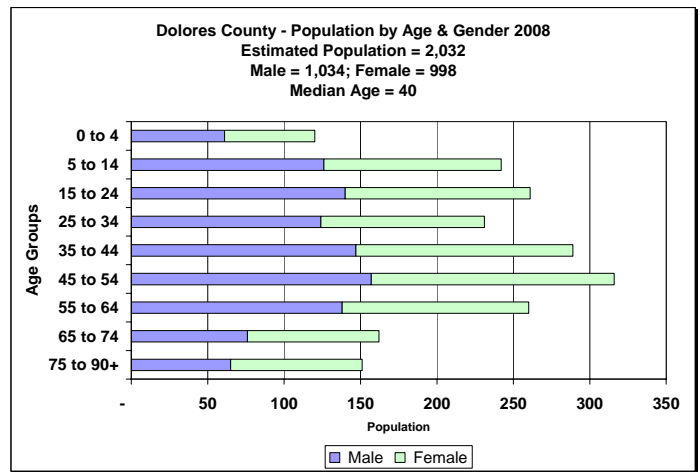

Average Annual % Change				
	1970-1980	1980-1990	1990-2000	2000-2008
Archuleta	3.4%	4.6%	8.5%	4.1%
Dolores	0.1%	-0.9%	2.3%	1.3%
La Plata	4.2%	1.9%	3.6%	2.0%
Montezuma	2.7%	1.4%	2.7%	1.3%
San Juan	0.0%	-1.1%	-2.5%	0.8%
Region 9	3.3%	1.8%	3.7%	2.1%

The Colorado Demography Office predicts the regional population will continue to grow, but the growth rate eventually will slow down. As a community we must find ways to plan for and manage growth. The challenge is to align economic growth and development in ways that will enhance the quality of our lives and protect our natural environment.

Age and gender estimates for 2008 present normal distributions for counties in our region, although the median ages are slightly higher than Colorado’s as a whole (36.5 is the median age in Colorado).

The Colorado Demography Office (<http://dola.colorado.gov/dlg/demog/>) and the Colorado Division of Housing (<http://www.dola.state.co.us/cdh/>) provide population and housing estimates for each town and for unincorporated areas. Group quarters can include school dormitories, group homes, prisons, etc.

A recent study by Region 9 (*The Social and Economic Effects of 2nd Homes – July 2006*) available at [www.scan.org](http://www.scan.org) indicates that many of the “vacant” units actually belong to non-local homeowners – those whose mailing addresses are outside the county where they own property. These part-time residents are not included in population counts. The impacts of second homeowners are still being evaluated, and the results of a pilot study of La Plata County are expected to be completed in July 2008.
